

1. Title Page

- **Title of the Report:**
 - **Author Name(s):**
 - **Client/Organization:**
 - **Date of Submission:**
-

2. Executive Summary

Briefly describe the project objectives, data used, approach taken, key results, and recommendations.

3. Introduction

Project Background

Explain the context of the project and its importance.

Objectives

List the main goals and intended outcomes of the project.

Scope of the Report

Mention the focus of the report and what is not covered.

4. Data Description

Source of Data

Provide a brief description of where the data was obtained.

Data Characteristics

Describe the dataset (e.g., number of rows, columns, and types of variables).

Data Quality

Briefly highlight any data quality issues identified.

5. Data Preprocessing

Summarize the steps taken to clean and preprocess the data, including handling of missing values and other preprocessing tasks.

6. Exploratory Data Analysis

Provide an overview of any key trends or insights discovered during the initial data exploration.

7. Key Findings

Highlight the most important findings from the data analysis.

8. Recommendations

Provide recommendations or actions to be taken based on the findings.
